Hyderabad, India
gurunathreddy4242@gmail.com

PROFILE SUMMARY

- Data Engineer with 4+ years of experience in designing and delivering scalable data solutions using Python, PySpark, SQL, Apache Spark, AWS, and Azure.
- Expertise in building end-to-end ETL/ELT pipelines using Apache Airflow and Azure Data Factory.
- Experienced in processing millions of records daily from APIs, databases, and SFTP sources.
- Hands-on experience with Azure Databricks, Azure Synapse, AWS Glue, Amazon S3, and Athena.
- Designed and implemented Bronze, Silver, and Gold layer data lake architectures for enterprise data platforms.
- Optimized Spark workloads and data pipelines, improving processing efficiency by up to 20%.
- Enhanced query performance by up to 25% through data modeling and performance tuning.
- Automated 50+ data workflows, ensuring 99.9% pipeline reliability through monitoring and validation frameworks.
- Strong experience in implementing data quality, schema validation, error handling, and governance practices to ensure accurate and reliable data delivery.

WORK EXPERIENCE

RACENERGY

From: 2021 Oct – 2023 May
Hyderabad.

INTENSO TECH SOLUTION PRIVATE LIMITED

From: 2023 June – Present
Bangalore

ACADAMEIC PROFILE

B Tech: Visvesvaraya College of Engineering and Technology – CGPA: 6.6

Inter: Sri Gayatri Junior College – CGPA: 8.8

TECHNICAL SKILLS

- **Programming Languages:** Python, Java, NextJS
- **Big Data Technologies:** PySpark, Apache Spark, Apache Airflow
- **Databases:** SQL, MongoDB, Supabase
- **Cloud Platforms:** Azure Databricks, Azure ADF, Amazon Web Services, Render, Docker
- **Backend & APIs:** REST APIs, API Integration
- **AI & Data Science:** Machine Learning Algorithms, Classification, Clustering, Neural Networks, TensorFlow, Keras, NLP, BERT
- **Version Control:** Git, GitHub, VS Code, Jupyter Notebook

SOFT SKILLS

Time Management

Prioritizes essential tasks so they are not rushed. Sets deadlines that ensure reaching milestones on time.

• **Adaptability**

I remember that change is not personal and is inevitable. I break my projects into multiple parts so that if something goes wrong, I can quickly fix it.

PROJECT DETAILS

1 .Project Title	Data Lake Automation with Python and AWS
Period	RacEnergy
Position	Data Engineer
Description	Implemented an automated data lake solution on AWS using Python, Amazon S3, AWS Glue, and Amazon Athena, enabling seamless data ingestion, processing, and analytics.
Responsibilities	1. Designed and implemented a scalable data lake architecture using Amazon S3 for secure and cost-effective data storage. 2. Built ETL workflows using AWS Glue to ingest, transform, and catalog data from multiple sources. 3. Optimized data querying and analysis using Amazon Athena for efficient serverless data access. 4. Ensured data quality, validation, and integrity through automated checks, monitoring, and error-handling mechanisms.
Technical Skills	Python, SQL, AWS , Pandas, AWS Glue

2 .Project Title	Customer Ticketing Trend System with Azure
Period	Intenso Tech Solution Private Limited
Position	Data Engineer
Description	Develop data pipeline and implement using Apache Airflow, Azure services (Azure Data Lake Storage, Azure Functions), and Azure SQL Database. The pipeline ingests data from various data sources, performs transformations, and loads the processed data into an Azure SQL Database data warehouse for analysis.
Responsibilities	1. Built data pipelines using Azure Data Factory to ingest data from APIs, databases, and SFTP into Blob Storage. 2. Processed and transformed data using Azure Databricks (PySpark) into Bronze, Silver, and Gold layers. 3. Developed data models in Azure Synapse Analytics for reporting and KPI analysis. 4. Enforced incremental loading, data validation, and monitoring to ensure data quality and performance.
Technical Skills	Python, SQL, Pyspark, Microsoft Azure, Apache Airflow
